# Controlled Burning Wraps-Up on State Trust Lands near Black Lake NM, Smoke Expected to Continue for Several Days

Angel Fire, NM – [Moreno Valley Fire Department](#), [Angel Fire Fire Department](#), [Terra Fuego Resource Foundation](#), the [Taos BLM](#), [NM State Forestry Returning Heroes Program](#), [Santa Fe Youth Works](#), the [Santa Fe National Forest](#), Taos Ski Valley, the [Forest Stewards Guild](#), and [The Nature Conservancy's Fire Learning Network](#) have safely returned fire to approximately 500 acres of ponderosa pine, aspen, and mixed conifer forest on state trust lands managed by the [New Mexico State Land Office](#) near Black Lake New Mexico. This burn is training new firefighters who are working alongside highly qualified and experienced firefighters. Broadcast burning promotes ecological health, reduces hazardous fuels thereby protecting nearby communities, and reduces the intensity and size of future wildfires.

Ignitions are not planned for today or Friday, though fuels continue to consume and flames and smoke are expected for several days. Excellent ventilation is expected today and good ventilation expected on Friday. Smoke will settle in low lying areas in the evenings and at night for several days. Caution is advised near the junction of highways 120 and 434 in the evenings. More information on smoke and human health can be accessed here, [https://nmtracking.org/enviro\\_n exposure/fire-and-smoke/](https://nmtracking.org/enviro_n exposure/fire-and-smoke/).

Landowners interested in learning more about Fire Adapted Communities can visit [www.fireadaptednm.org](http://www.fireadaptednm.org), a website designed by the Forest Stewards Guild and Fire Service Support LLC for the New Mexico hub of the Fire Adapted Communities Learning Network.
