

Announcing a Series of Workshops

Fire Science and Management in the Southwest

hosted by

Southwest Fire Science Consortium

The SW Fire Science Consortium is hosting a series of workshops in January 2010 to present local research and gather input to complete its grant proposal for full funding by the Joint Fire Science Program. The Consortium will be a way for managers and scientists to interact and share science in ways that can effectively move new information to management practices. Don't miss out on the opportunity to increase your knowledge about new science in your area and help us focus the grant proposal to your needs in the field...
